

Export to countries outside the EU

- The vehicle is initially invoiced gross and the total sum including VAT is paid to us.
- We place the VAT in a safe custody account.
- You receive a receipt for the total sum paid.
- Once you have exported the vehicle, you send us the original stamped copy of the customs export declaration (yellow slip) or, in the event of an electronic export declaration, inform us of the MRN number.
- We use the MRN number to obtain the proof of exportation from German customs.
- After submission of the yellow slip or the electronic export declaration, we will refund the VAT you paid to the account you have specified.

Should you have any further questions or require support, we will of course be happy to help.
