

Sales to commercial customers in the countries of the European Union

On presentation of the following documents, the vehicle may be purchased net, i.e. excluding VAT, if you intend to purchase it as a commercial customer and transport the vehicle using a shipping company:

- Proof of commercial identity (excerpt from the trade register)
- Proof of the company's legal representatives by presentation of articles of association
- Copy of the company legal representative's passport
- Proof of issuance of a VAT ID number
- If the vehicle is collected by an authorised representative: the authorisation and a copy of the passport belonging to the person who collects the vehicle

We will prepare the following documents once the above points have been satisfied:

- A binding order for the vehicle
- Confirmation that the vehicle is being purchased for the commercial activity of the company
- Written assurance from the person collecting the vehicle to the effect that the vehicle will be delivered abroad, stating the actual destination

If the vehicle is physically driven out of Germany, we are obliged to temporarily withhold the VAT as a deposit. Once you have sent us a confirmation of arrival from the destination country (e.g. by fax or email), we will prepare a net invoice and pay out the VAT.
