

Sale of new vehicles in terms of the Umsatzsteuergesetz to private customers within the EU

In accordance with the specifications of the EU, a vehicle shall be considered a new vehicle when not more than six months have passed since it was brought into service. With our vehicles this is often not the case. Alternatively, the mileage travelled may not exceed 6,000 km. This is the rule with our vehicles.

If a vehicle purchased from us has a mileage of less than 6,000 km, the turnover tax is to be paid in your home country. To ensure that you do not incur double VAT, we can reimburse you with the VAT in accordance with the following stipulations:

- The vehicle is initially invoiced gross, i.e. including German turnover tax, and paid for in full.
- We place the VAT in a safe custody account.
- You receive a receipt for the total sum paid.
- You export the vehicle to your home country, register it there and pay the VAT there.
- You send us confirmation from the tax office that the VAT has been paid and a copy of the registration documents for the vehicle
- You provide us with your bank account details so that we can reimburse you.
- We will transfer the VAT we placed in a safe custody account to you immediately.

We will be happy to answer any queries you may have.
